Capture, track and resolve bugs and issues throughout your entire development process. Provide a single source of truth of all your issues and help your team prioritize against their big picture goals, while continually delivering value to your customers.

Identify and capture bugs

See all your bugs in one place. Once you've identified a bug, capture its details by creating an issue from anywhere in your project. Each unique issue type can have its own custom workflow.

Assign and prioritize

Once captured, bugs can be ranked and prioritized based on importance, urgency, and your team's workload capacity. Assigning bugs is easy and can be accomplished in only a few keystrokes from the issue.
